Yes, ACOA Generic IA for \$150 is completed and awaiting agency signatures. Next step is working with Paula on the WAFs. That will include the two specific SOWs and two different a-k breakouts; RI/FS and PRP oversight.

Also, there is a site specific ACOE IA that just received additional money for the data organization piece and shoring up the Sacramento piece to the QMP.

USGS IA for Andrew Todd just had a major setback. It took the DC Service Center 8 weeks to process and then they decided it needed to be split into two different IAs--one for CWA money and the other for CERCLA. SO I will split it apart on Fri and get it in the system but processing has to start over and could take another 6-8 weeks . I asked Stan to send a note with it requesting it to be expedited. I talked to Dan Wall and there is some "found" money, around \$3500 that can keep Andrew going until he gets it. This was a new IA that had to start because the old IA exceeded the time allowance. CERCLA funding \$25K and CWA funding \$60K

Thanks Robin. Do you have a short synopsis of where we are on the various IAs relevant to the Upper Animas Site?

Current ACOE Generic IA: Funded \$\_\_\_\_\_, Scope \_\_\_\_\_  
New ACOE Site-Specific Generic IA: Status \_\_\_\_\_, Funded \$\_\_\_\_\_, Scope \_\_\_\_\_

Current USGS IA (Jean W.?, Andrew S.): Status \_\_\_\_\_  
New USGS IA: Status \_\_\_\_\_, Funding \_\_\_\_\_?

Thanks,  
Steve
